

# E76

5/18/2000

**The most hazardous component in traditional D76 is the Hydroquinone. The EPA lists this agent as an airborne carcinogen. So, even if you are not going to try E76, do buy your D76 in liquid form.**

**FORMULA [to make one liter]:**

<b>0.2 grams</b>	<b>phenidone</b>
<b>100 grams</b>	<b>sodium sulfite</b>
<b>8 grams</b>	<b>vitamin C (powdered)</b>
<b>12 grams</b>	<b>borax</b>

**Use exactly the same developing times as traditional D76.**

**There is some affect of aging on this developer, it gets stronger over the period of a couple of weeks.**

**NOTE: Crone-C additive will NOT work with E76**

**You can get the powdered Vitamin C (ascorbic acid) from health food stores.  
[Do not use sodium ascorbate in place of ascorbic acid [Vit C]]**
